Expanding our commitment to “in stock” responsiveness

UAI is constantly working to improve its value as a strategic resource to OEM customers, especially to those who must keep their production processes seamlessly flowing. Our supply management program assures consistent inventory without tying up your working capital. It's one of many ways UAI becomes an integrated partner to world class manufacturers, offering technical innovation, strict process controls and a trusted reputation for quality and on-time deliveries. We are continually thinking of new ways to go beyond fabrication, to become a true integrated business partner to our valued customers.

Our qualified engineers and skilled craftsmen work within a 200,000+ square foot facility, utilizing ISO 9001 certified processes and lean manufacturing principles to give customers both the uncompromising quality and the globally competitive cost savings they demand.

Customer advantages

- Improved customer lead times on standard products
- More compressed lead times on non-standard products
- “Reserved” capacity set aside to meet the needs of contract customers
- Improved scheduling of labor resources – level loading direct labor
- Increased flexibility for receipt of contract products
- Reduced overtime scheduling and related costs
- Improved forecasting ability for labor resource requirements
- Increased leverage with steel supply chain
- Mitigation of the perpetual 4th quarter “crunch”
- More effective management of capacity
- Overall continuous cost avoidance
- Improvement in a customer’s cash flow
- Reduction in the level of inventory a customer must hold
- Not a sales “gimmick,” but true business financial advantages and cost savings

For complete information and details on contract fabrication, call us directly at 608.758.4717 or email us at rfq@unitedalloy.com and we will be happy to fulfill your needs.

Investing in Our Customer's Success

“As customer needs and expectations grow, United Alloy is dedicated to growing with them. Not only to meet the need, but to exceed it, and to achieve ongoing leadership in the fabrication industry world wide.”

Engineered Solutions

Quality engineered for superior results.

Our engineering skill, fabrication craftsmanship and business strength are focused on one goal: delivering products

that meet specialized requirements with lasting performance and exceptional quality. To achieve this, UAI is constantly expanding its range of automated welding,

machining and powder coating capabilities. We have established a world class manufacturing environment in which excellence is the norm, and perfection is the expectation.

UAI is committed to consistently providing innovative, world class products and services, while continually improving our Total Quality Management System to create the advances in efficiency that deliver measurably improved customer value.

The result is a seamless integration into our customer's production processes.

Automated Manufacturing

UAI employs the latest in lean technologies to assure customers consistent quality they can count on. Our close partnership with customers gives us a thorough understanding of their products and production requirements.

Logistics

Include UAI in your entire production process from initial design through final shipment, to ensure maximum cost savings and superior quality in every phase of your product's manufacture and delivery.

Looking forward

As technology advances and customer expectations grow, the UAI of tomorrow is bound to change. Only one thing will always remain constant: a rock solid commitment to

integrity, reliability and service to our valued customers. Our history proves it, and our investment in the future is evidence that our customers will be able to trust us well into the future.
